

# RUTGERS

School of Arts and Sciences

2019-2020 LECTURE SERIES

# Center for Human Evolutionary Studies

Ruth Adams Building, Room 001, 3:30pm

**Behavioral Adaptation in Highly Changing Environments: The Role of Uncertainty Estimation and Natural Variability in Fishing Captures**

Victoria Ramenzoni (Rutgers University), September 27

**The Curiosity Conundrum: What Orangutan Curiosity and Intelligence Tell Us About Human Evolution**

Carel van Schaik (University of Zürich), November 1

**Dogs and People and Dingoes**

Patricia Shipman (Pennsylvania State University), January 24

**Microarchaeology and the Underlying Science**

Steve Weiner (Weizmann Institute of Science), February 7

**Genetic Variation in Howler Monkey TLR7 and TLR8 and Potential Implications for Susceptibility to Yellow Fever Virus**

Nicole Torosin (Rutgers University), February 14

**What Ernst Mayr Didn't Know: Insights into Baboons and Other Primates from Whole Genome Sequencing**

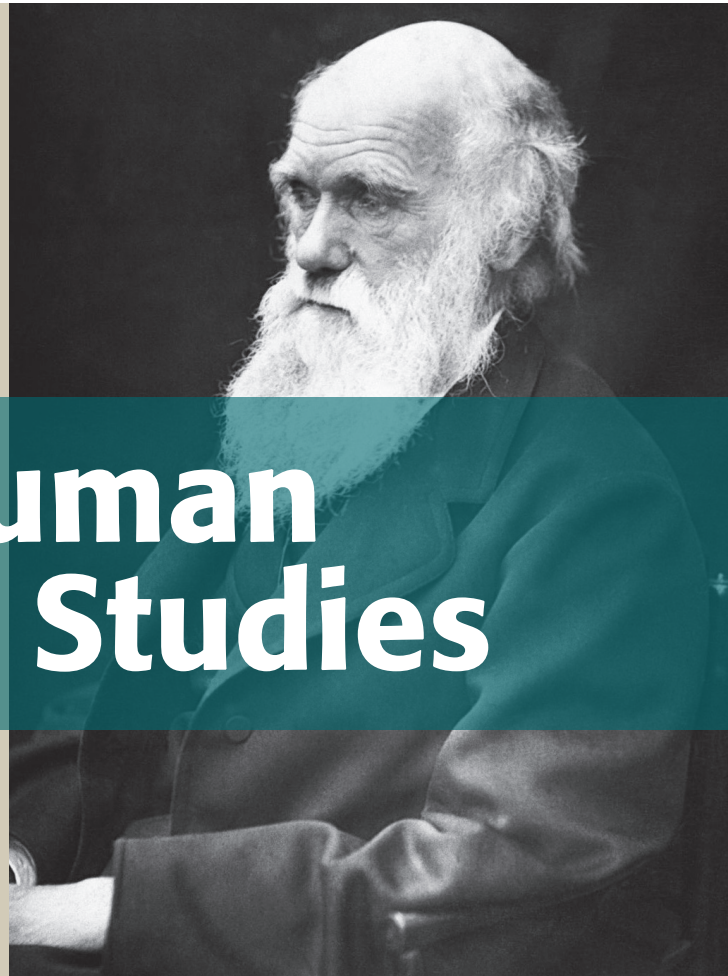

Jeffrey Rogers (Baylor College of Medicine), February 28

**The Changing Landscape of Hominin Evolution – A View from Afar**

Chris Campisano (Arizona State University), April 3

**Adaptive Evolution in African Rainforest Hunter-Gatherer Populations**

Christina Bergey (Rutgers University), May 1
